LANDSAT

GEO-ENGINEERS

Pvt Ltd

ZIMBABWE

COMPANY OVERVIEW

Landsat Geo-Engineers Pvt Ltd is a Zimbabwean surveying, engineering and construction company providing professional services across land development, infrastructure, construction and built-environment projects. The company combines technical accuracy, regulatory compliance,

development principles to deliver reliable project solutions for individuals, businesses, public institutions, mining entities and communities.

VISION

To be a leading geo-engineering and construction firm delivering innovative, precise and sustainable solutions that shape resilient communities and infrastructure.

MISSION

To provide high-quality surveying, engineering, construction and planning services through technical excellence, integrity and innovation, delivering reliable solutions that meet client needs, comply with standards and contribute to sustainable development.

SERVICES

Town Planning

We design residential layouts and planning solutions that meet council and legal requirements.

Civil Engineering and Construction

We design infrastructure such as drainage systems, water supply systems, dams and structural works.

Architecture

We prepare house plans and building designs that suit client needs and building regulations.

Construction Budgeting

We prepare cost estimates and bills of quantities to help clients plan and budget for construction projects.

Electrical Installations

We provide electrical design, installation and maintenance for homes, businesses and industrial projects.

Land Surveying

We provide accurate land, engineering, topographic and mining surveys for different project needs.

WHO WE ARE

Landsat Geo-Engineers Pvt Ltd is a Zimbabwean multidisciplinary surveying, engineering, planning, and construction company committed to delivering innovative, accurate, and sustainable solutions for land development and infrastructure projects. Established to meet the growing demand

services, the company combines technical expertise, industry experience, and modern technology to provide reliable services to individuals, private organizations, government institutions, mining companies, and local authorities.

Our operations are guided by the principles of precision, integrity, professionalism, and excellence, ensuring that every project is executed to the highest standards while meeting regulatory and environmental requirements. Through a client-centered approach, we strive to provide practical solu-

structure development, and community transformation across Zimbabwe.

Our strength lies in our ability to provide integrated solutions that combine surveying, engineering, planning, and construction expertise. We understand that every project is unique, and we work closely with our clients to develop customized solutions that meet their specific needs and objectives.

OUR STORY

Landsat Geo-Engineers Pvt Ltd was founded with a vision to bridge the gap between technical expertise and sustainable development. Recognizing the need for reliable surveying, engineering, and construction services, the company was established to offer comprehensive solutions under one

Over the years, we have expanded our capabilities to include land surveying, town planning, civil engineering, construction management, architecture, electrical installations, and project budgeting. By integrating modern technology with professional knowledge, we continue to deliver projects

communities.
